

# VIRTUALLY yours

see your bathroom before you buy

Imagine walking into a car showroom and being shown a headlight, seat and steering wheel, and then being expected to buy the car after having seen a line drawing. It may sound silly but up until now, this is how you were expected to purchase your bathroom. Not any longer. Thanks to Virtual Worlds you can now see exactly what your bathroom will look like. Rest assured, you will know that you have made all of the right choices from the style of tapware right down to the colour of your tiles. In the Virtual World you can travel through your room taking a close look at certain details and design features. If there is anything that you are not sure about, your designer can make 'live' changes to your liking. Virtual Worlds can produce Photo Realistic Images of your bathroom showing many effects such as reflections in mirrors and emission from lights. Ask your designer/retailer for the Virtual World service. Once you've experienced it you could never imagine buying a bathroom any other way.
